Qualcomm
Education as a Service

Transforming the digital and hybrid classroom and campus experience

Qualcomm EaaS is a single integrated solution with a suite of EdTech devices and services enabled by broadband, Wi-Fi connectivity, edge computing, AI, and cloud technology.

Smart Lightboard

A transparent lightboard allows teachers to write on the board without turning their back. The built-in camera flips the image so writing displays correctly for the students.

eGlass

Campus Safety with Intelligent Cameras and AI

Safely manage and secure school classroom and campuses.

OneScreen I AI View Smart Cameras

Personal Security Badge

Real time-location and priority notification badge

OneScreen MeerkatSafe

Entryway Health Scanner

Temperature, mask and facial recognition scanner.

OneScreen GoSafe

Teaching Smart Screen

Centralize and modernize the hybrid classroom and learning experience. Central, Annotate, EShare and Revel.

OneScreen Hubware Smart Screen

Campus-Wide Connectivity

Bringing the latest broadband and Wi-Fi options to school classrooms and campuses to keep students and teachers connected.

Powered by Qualcomm Technologies connectivity solutions

Wireless Teaching Podium

A wireless digital teaching station with UHD casting, 4K video and removable wireless interactive tablet with fold-out document camera.

Hovercam Pilot S Wireless Podium

Windows Laptops and Chromebooks powered by Snapdragon

Learn and teach virtually anywhere with Snapdragon powered laptops.

Qualcomm® Snapdragon 7c and 7c Gen 2 compute platforms

The result is blended, personalized learning in the classroom as well as campus control through digital transformational services.

- **Drives and Improves Student Engagement**
- **Creates Digital Equity Access for All Students**
- **Enables Safe and Secure Campuses**
